A foreword by Arif Ashary, Founder & Creative Director

A work of art is an act of great bravery. If the artist is honest with himself, his art fully exposes his spirit to the audience. He stands naked, waiting and hoping that what he has expressed in his words, brush strokes and sketches will stir his viewers and remind them of a similar emotion they too have experienced. All artists struggle with this duality of producing work, that is a true reflection of their passions and that also leaves the audience satisfied. I am extremely fortunate that, throughout my career, I have been able to

achieve both of these goals. I believe the key to this lies in the fact that all my work is meant to be enjoyed environmentally. Whether I am creating a piece of furniture, painting on canvas or designing a building, my art is made to be enjoyed and lived with on a daily basis. It is accessible and approachable. Its purpose is to bring beauty into the spaces where you work, relax and live while making these intimate places more functional and comfortable. I invite you to join me in dreaming without limits.

ASHARYS
EST. 1989

Innovative and ground breaking architecture is our passion. For more than 30 years, Arif Ashary has been designing residential and commercial spaces. These spaces have successfully expressed the clients' personalities and desires— who they are, what they stand for, and what speaks to them.

This Mediterranean Villa is defined by an open style with large exterior windows, a tiled roof, and stucco siding. This openness hearkens toward pleasant weather, making this Mediterranean villa ideal for warmer climates.

At Asharys, we start with your ideas and visions and combine them seamlessly with our artistic expertise and technicality. The result is a work of functional art, co-created with you, rather than designed for you. As we are not limited to any architectural style – your aesthetic taste, site considerations, and requirements ultimately determine the style and structure of the creation.

This contemporary villa emphasises a direct connection between indoors and outdoors. It features common design elements such as tall windows; bold geometric shapes; and asymmetrical façades and floor plans.

Asharys' Interior Designers bring to life an artistic vision for work and living spaces, seeing out a project from conception to creation. Each element of every room is carefully hand picked with the finest use of opulent and exotic materials and finishes for furnishings, fixtures and decorative pieces. Our designers are meticulously trained in paying the utmost attention to detail while skilfully balancing the need for functionality and extraordinary style.
