*A foreword by Arif Ashary, Founder & Creative Director*

A work of art is an act of great bravery. If the artist is honest with himself, his art fully exposes his spirit to the audience. He stands naked, waiting and hoping that what he has expressed in his words, brush strokes and sketches will stir his viewers and remind them of a similar emotion they too have experienced. All artists struggle with this duality of producing work, that is a true reflection of their passions and that also leaves the audience satisfied. I am extremely fortunate that, throughout my career, I have been able to

achieve both of these goals. I believe the key to this lies in the fact that all my work is meant to be enjoyed environmentally. Whether I am creating a piece of furniture, painting on canvas or designing a building, my art is made to be enjoyed and lived with on a daily basis. It is accessible and approachable. Its purpose is to bring beauty into the spaces where you work, relax and live while making these intimate places more functional and comfortable. I invite you to join me in dreaming without limits.
